# Schedule of Events – Friday May 24th 2019

## Program Objectives:
- Develop an approach to the diagnosis and management of anterior, intermediate, and posterior uveitis
- Develop an approach to the management of uveitis in the pediatric population
- Understand the association between uveitis and systemic disease, and the role of systemic investigations in the work-up of the uveitic patient
- Review the use of various ocular diagnostic imaging tools to aid in diagnosis
- Review past and current treatment options for uveitis, and discover future directions for therapies
- Discover associations between the microbiome of the gut, and uveitis
- Discover the role and application of robotic surgery for retinal disease
- Review strategies for performing cataract surgery in the uveitic patient
